NEW Spectrophotometer

CM-26dG

CM-26d

CM-25d

Advanced performance
for the times.

Easy operation
for front-line use.

Highest level of repeatability with high inter-instrument agreement, incomparable speed, and high usability.

The CM-26dG Series from Konica Minolta offers three variations of advanced portable spectrophotometers.

The high-end CM-26dG and CM-26d models bring the industry's highest level of accuracy, with the CM-26dG capable of simultaneously measuring color and gloss, and the CM-26d specifically for measuring color.

The lineup is rounded out with the high cost-performance model, the CM-25d.

■ 2-in-1 instrument for measuring color and gloss

The CM-26dG performs the job of two instruments by simultaneously measuring color and gloss. Because color and gloss measurements can be done with a single device, separate spectrophotometers and glossmeters do not need to be prepared and switched in and out, which instantly improves work efficiency especially when measuring a large quantity of samples.

■ Incomparable speed

The CM-26dG measures color in about half the time required of previous models, at approx. 0.7 sec (SCI or SCE). Moreover, it takes about 1 sec to measure both color and gloss (SCI or SCE + Gloss). The faster measuring speed translates into higher work efficiency.

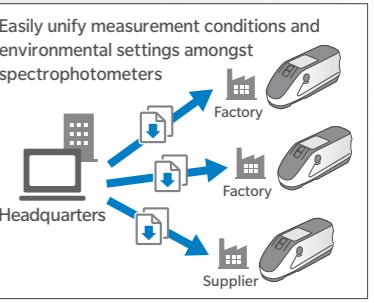

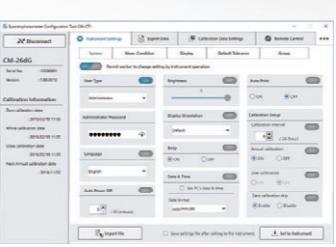

■ Highest levels of repeatability and inter-instrument agreement amongst portable spectrophotometers

Because of the way supply chains are constantly being built and modified, data needs to be shared amongst increasingly more sites. This has made high repeatability and high inter-instrument agreement prerequisites for portable spectrophotometers. The CM-26dG and CM-26d realize the highest level of inter-instrument agreement amongst currently available portable spectrophotometers, at ΔE^*ab 0.12 (BCRA average amongst 12 colors). And when measuring gloss, inter-instrument agreement of the CM-26dG is within ± 0.2 GU (0-10 GU) or ± 0.5 GU (10-100 GU). Moreover, repeatability is half that of predecessor models, at $\sigma\Delta E^*ab$ 0.02. The contribution to digital color data management that this level of performance offers will help manufacturers enhance quality management between their factories and suppliers.

<Quick and easy-to-use Spectrophotometer Configuration Tool CM-CT1>

The CM-CT1 gives manufacturers the means for easily and quickly setting up their CM-26dG Series spectrophotometers. Moreover, when multiple devices are used or when the same conditions need to be set amongst multiple factories or suppliers, settings can be compiled into a file and shared.

Spectrophotometer Configuration Tool CM-CT1 ● OS : Windows® 7 32 bit, 64 bit / Windows® 8.1 32 bit, 64 bit / Windows® 10 32 bit, 64 bit
● CPU: 2 GHz equivalent or faster ● Memory: 2 GB or more ● Hard disk: 10 GB or more of free space for installation ● Display: Resolution: 1,024 x 720 dots or more / 16-bit colors or more ● Other: USB port (For connecting to spectrophotometers)

■ Viewfinder

The viewfinder brightly illuminates the measurement point with an LED to make target alignment faster, easier and more precise. It also incorporates a pointer that makes it even easier to identify the measurement area. Moreover, because it allows the user to look down from above the spectrophotometer, the viewfinder is perfect for setting measurement points on patterns and prints.

■ Compact, lightweight streamlined body

Designed to work in hard-to-reach places, the CM-26dG Series spectrophotometers allow users to take measurements where previous models could not. The nose is angled downward and rounded at the corners to get into cramped spots like dashboards at a point near the windshield. Moreover, the plastic target mask lessens the risks of scratching the sample. And there is a trigger button on both sides so that measurements can be taken stress-free in any sort of situation, no matter which hand you use.

■ High usability and functional versatility

<JOB Function>

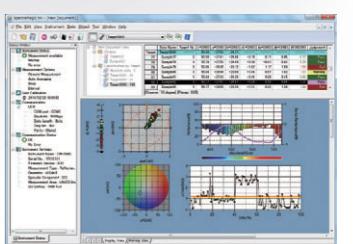

Instructions (including photos) for often-used workflows can be registered using SpectraMagic NX (Ver. 2.9 or later, sold separately).

<Bluetooth® ready>

Data can be wirelessly transmitted to computers or other paired devices over a Bluetooth connection.

Color Data Software SpectraMagic NX

SpectraMagic NX is color management software that gives users a plethora of functions for viewing, operating and controlling their spectrophotometers from a computer. Users can create their own windows by arranging and editing spectral graphs, color difference graphs (2D, 3D), OK/NG indications and other objects to suit their needs.

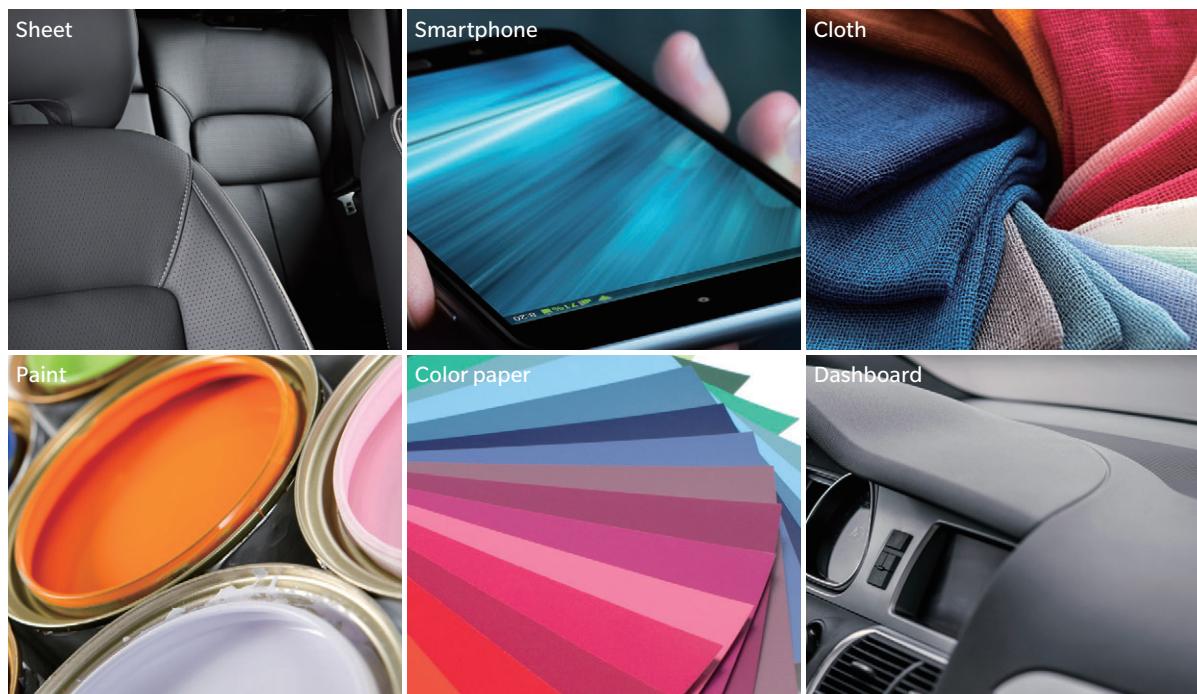

SpectraMagic NX Ver. 2.9 or later ●OS: Windows® 7 Professional 32 bit, 64 bit / Windows® 8.1 Pro 32 bit, 64 bit / Windows® 10 Pro 32 bit, 64 bit

* The computer must be running one of the above OS and meet or exceed the below specifications.
●CPU: Pentium® III 600 MHz equivalent or faster ●Memory: 128 MB or more (256 MB or more recommended) ●Hard disk: 450 MB or more of free space for installation ●Display: Resolution: 1,024 x 768 dots or more/ 16-bit colors or more ●Other: DVD-ROM drive (for software installation), USB port (for entering the protection key), USB or serial port (for connecting to spectrophotometers) and Internet Explorer Ver. 5.01 or later installed
